

Since 1956, POSSEHL SPEZIALBAU has been active in the field of maintenance of vehicular-use surfaces, industrial and manufacturing areas, and aircraft-use pavements to maintain their value and ensure their use.

The company's headquarters are in Sprendlingen, Rheinland-Pfalz, Germany. In order to be closer to its customers, POSSEHL SPEZIALBAU is divided into regional divisions and operating facilities. The division Special Coatings for Airfield and Road Infrastructure is also based in Sprendlingen, and is internationally active.

Specialist company according to WHG

POSSEHL Spezialbau GmbH is a  
member of the POSSEHL Group,  
Lübeck

From the very beginning, our corporate guidelines have entailed offering all construction services, including preparatory and additional work, from one source - to the benefit of our clients.

We view interdependent cooperation of the individual specialty divisions as one of our great strengths. Always standing behind POSSEHL SPEZIALBAU is a team of experienced specialists in the fields of surface construction and maintenance, who use their knowledge and expertise to focus on customized solutions to problems for the benefit of the customer.

The pavement protection  
against heat, fuel and chemicals

# THE PROTECTIVE COVER FOR YOUR PAVEMENT **POSSEHL PAVEPROTECT**

**POSSEHL PAVEPROTECT** is an epoxy treatment applied for the protection of surfaces exposed to aggressive substances. Treated surfaces present the following benefits:

- Extension of the functional life time of the asphalt / concrete wearing course
- Resistance to heat, fuel and all known chemical de-icing agents
- Resistance to rubber / dirt removal effected by high-pressure water equipment (fan jet nozzles)
- Protection of subbase against the effects of aging and environmental influences (weather conditions, UV-rays, de-icing agents, fuel)

**POSSEHL PAVEPROTECT** uses a special sand embedded in a two-component epoxy resin binder for which POSSEHL has over sixty years of experience. An optional special tinted top coat is available in most various colours.

**POSSEHL PAVEPROTECT** is installed by a specialized machinery with integrated controls that ensures precise distribution of the binding agent; the treated surface is available for use after a few hours only. A day or night application allows minimized disturbance of operations.

The **POSSEHL PAVEPROTECT** coat is approx. 3mm-thick and makes the raising of existing gutters and adjacent surfaces unnecessary.

**POSSEHL PAVEPROTECT** is suitable for all kinds of areas, such as aprons, taxiways, ports, heliports or logistics facilities, which are exposed to the above mentioned damaging elements.
